VENUE
Rydzyna Castle, Plac Zamkowy 1, 64-130 Rydzyna, Poland
Start up: 24 April 2017
Adjourn: 25 April 2017
CONFERENCE OUTCOMES

Answers to questions such as:

- What possibilities will recent research and development bring in the field of buried flexible structures?
- What are the new areas of application for buried flexible structures?
- What is the best way to design buried flexible structures?
- What is the influence of the soil in the design and construction of buried flexible structures?
- What are the current limits of applications (spans, shapes, corrugations)?
- What are the specific features for applications and design in roads and railways?
- Design in sloping terrains. Experience and suggestions.
- Fatigue in flexible structures. Current findings and design application.
- What are the best examples of design, construction and aesthetics of flexible structures?
- What are the maintenance and durability issues related to hundreds of thousands of built flexible structures across the globe?
- What are the best bridge and culvert management practices for flexible structures?
- What are the environmental aspects of using buried flexible structures?
- How does life-cycle and sustainability issues affect buried flexible structures?
- What are the advancements in corrosion protection systems?

PRACTICAL INFORMATION

Free conference app for your mobile phone shall be available short before the event. Look for BFSS2017 app on your Google Play (android) and App store (iOS). Install it and get access to every current information.

Please inform us in writing on secretariat@conference-flexiblestructures.com how are you planning to reach Rydzyna castle.
